

Far Away by Princess Iris

*Far Far Away,
Is so unlike the place I stay,
Sum things the same,
As some go different ways.*

*Livin the street life,
Keepin hustles in line,
Smokin up dimes,
To feed my mind.*

*Far Far Away,
Isn't out in L.A.,
It's not the usual thang,
But still the gang bang.*

*I keep it on the low,
All the time, I make flows,
I have another home,
In a place of the unknown.*

Far Far Away,

*Is not a place,
We see everyday,
But it's somewhere so many light years away.*

*Throughout the stars,
I journey a far,
Long past Mars,
Where another galaxy starts.*

*Far Far Away,
Knowledge isn't delayed,
I gaze in outer space,
For curiosity fills my brain.*

*This particular galaxy,
Ventures away from reality,
Unique kind of locality,
Brings the best outta me.*

*Far Far Away,
Pure beauty awaits,
Blue waters are tame,
Primitivity's the way.*

*I was on Planet Arus,
So lovely & fairest,
No wonder it's people cherish,
A home like many karats.*

*Far Far Away,
What had sprang,
I heard someone say,
What brings u on my planet today.*

*Blue eyes were dazzlin,
With warmth & compassion,
Chestnut blonde hair brings about attraction,
She's the type one could imagine.*

*It just wasn't her beauty,
That really moved me,
Friendliness renewed me,
Her kindness enthused me.*

*Moments spent in communication,
Felt like relaxation,*

*She's an angel from God's creation,
Never the type who'd be hatin.*

*The woman was so strong-willed,
She kept shit so real,
Out of royal duties to fulfill,
Helping others was her highest skill.*

*Ruler in her own right,
Makin days so bright,
Like a light, she shines,
With sparkle in her eyes.*

*To all, she's so important,
She eases our boredoms,
Smiles are sourin,
When we see Princess Allura.*

*Far Far Away,
In that same place,
There's a man so brave,
Handsome heroes who make my day.*

*Alongside with the Princess,
Handlin their business,
Savin world's from bein finished,
Replenishin lands with riches.*

*The man's keen sense,
Is like incense,
When it came to defense,
He'd always pass the test.*

*Evilness had made it's marker,
Makin landscape look harsher,
Just when things got harder,
Along came this Knight In Shining Armour.*

*I so highly speak,
Of this figure everyone needs,
I got luv so deep,
For this hero named Keith.*

*Far Far Away,
What had came,
Cities were in flames,*

Many innocents enslaved.

On the ground, I'm lyin,

Lookin up to be findin,

That in the air flyin,

Were 5 robot lions.

*One black, red, * green,*

Ya know yellow, blue, all lean & mean,

All out on the scene,

With enemies to defeat.

They had their own sense,

Special powers for defense,

With their own pilots doin best,

To wipe out them pests.

When it same to those five,

Together combined,

A robot with power & might,

Soaring high into the sky.

What cums to their turf,

*We defeat forces that lurk,
Savin good from the worse,
For he was Defender of The Universe.*

*Far Far Away,
Were boys from my way,
They traveled thru space,
To where thier mission be at the same place.*

*A heroic knight,
So smart & bright,
Led his flock of five,
Who were all heroes in their own right.*

*Something unique about each one,
Made them so much fun,
They all full of luv,
I give em' lotsa hugs.*

*We already met the teacher,
Who's knowledge goes deeper,
More serious but meeker,
After all, Keith's the leader.*

*There cums that chance,
For crackin jokes at hand,
If u second in command,
Then u must be Lance.*

*When my PC skips,
Or need one to play X-Box with,
Just count on martial whiz kid,
That shorty's known as Pidge.*

*Food is more fun,
Eating by the chunk,
If I wanna go out for lunch,
I'll be sure to call on Hunk.*

*I never hear much said,
He keeps a good head,
The most loyal friend,
Is the title I gave to Sven.*

*Far Far Away,
I stay squared away,*

When I misbehave,
There's parents who don't play.

One woman so demanding,
Drivin us antsy,
One time, she whooped Allura's fanny,
Betta watch out for Hurricane Nanny.

There's then this man,
Who stays pretty much at Castle Commands,
Makin sure all stick to their plans,
Typical advisor is Koran.

Far Far Away,
It's hard to face,
When invasions take place,
Attacks to be embraced.

I felt the floor vibrate,
Is there an earthquake,
No, this isn't a game,
Cuz u know there's missiles to blame.

The planet rattles,
As everyone goes out for battle,
Peoples hide beneath the castle,
As enemy troops give us hassle.

Lazon begans to pour,
With flames that torch,
Who left this planet torn,
It was the same man who murdered King Alfor.

I so much hate,
To see beautiful landscape,
Turn into waste,
As inhabitants become deranged.

Everyone weeps,
As they pray for peace,
What fuckin creeps,
Would cause chaos to increase.

People in misery,
Evil celebrates victory,
There cums time in history,

When they'll be gettin jittery.

Shit gets hot,

As monsters rot,

After they fought,

That one mighty robot.

Days however got bitter,

When one's piloting days simmered,

He was a fighter & a winner,

That one quiet dude was badly injured.

Pilot of blue lion replaced,

By a woman so brave,

With her royalty & grace,

Princess Allura now flies that thang.

Far Far Away,

What next awaits,

I got taken away,

To a planet of waste.

Here, there's no sparklin,

Troops & robots everywhere marchin,

Mind hardens,

In this place darkness.

Disgust & fate,

Overworked slaves,

Who the hell could take,

This God forsaken place.

Does any form of life,

Anywhere survive,

Hwo can one strive,

Betta be lucky u'r alive.

Vultures fly & screech,

Wantin carcass to feast,

I'd thought I'd never see,

Monsters called robeasts.

Enormously sized creatures,

With their own features,

Jeepers creepers,

Who created such man-eaters.

No soil to erode,
Cuz plants can't grow,
Even with all the gold,
Made from precious stones.

Too many bad vibes,
From hearin screams & cries,
So many signs,
Of wickedness that lies.

Sadness lingers,
From a castle topped with fingers,
No mercy for the weaker,
Not one friendly greeter.

Through dark stone walls,
Echoes monstrous calls,
The first one I saw,
Is the Royal King who conquers all.

He's no enlightenment,
Expects much compliance,

Torturing those defiant,
For he's the case of an evil tyrant.

Planets far gone,
Peoples distraught,
Evil forces are strong,
Under the rule of King Zarkon.

Betta watch u'r chips,
Dark spells get whipped,
Haggar's a typical Grinch,
For she's Zarkon's wicked witch.

In her lab she retorts,
Where she does her chores,
Evilness takes course,
When them robeasts are born.

This duo feels honored,
Over planets they've conquered,
Theyoften ponder,
About how they became ballas.

Far Far Away,
I was a pleasure slave,
I was so amazed,
Over sum shit that made my day.

Tore up from the wine,
I couldn't draw straight lines,
I fell on my behind,
Over what came before my eyes.

Eyes widened with shock,
Jaws began to drop,
In this place covered with sot,
I still found sumwun hot.

Them saffron eyes,
Just sparkle so bright,
Hair so long, silky, & white,
That flows so nice.

That azure complexion,
Brings about lust & affection,
I quickly made connection,

To the dude I was checkin.

This is a case,

Of an ultimate crave,

Damn, I'd die for a taste,

Of that pretty ass face.

I heightened his awareness,

As I worked in his harem,

On me, he kept glarin,

For soon, it would be gifts we sharin.

At first, we were cool,

Like them dudes,

I chilled with in school,

We ran together & acted like fools.

Our intimate friendship,

Was to be a blessin,

Even when he made his confession,

That Princess Allura was his obsession.

His luv for her was really deep,

Usin every trick up his sleeve,
To kidnap her while she sleeps,
Convincin her to become his queen.

Tears would fill his eyes,
Cuz it was he, she despised,
How & why,
Could she not want sumthin this fine.

I hated to watch him grieve,
After gettin called a beast,
Nurturing luv was his biggest need,
I cheered him up by offerin him some weed.

From the wine, we was drunken,
Gettin lost in discussion,
My cheeks were blushin,
When I felt his fingers touchin.

Our faces bloomed like petals,
Gettin hot & steamy as kettles,
In his chambers, we got settled,
To take dis shit to another level.

We both undressed,
He began to caress,
While I smooched his chest,
I'm droolin over his soft, blue flesh.

I'm givin him head,
In his own bed,
He's got me wet,
Cuz he gives it best.

Never have I felt so primped,
I'm so full of bliss,
After makin luv with,
This handsome Crown Prince.

Amidst his amusement,
I sensed confusion,
From trouble that be brewin,
I did my best to comfort & soothe him.

The planets he destroyed,
Bought him no joy,

Brutal acts not done by choice,
Livin a life he couldn't avoid.

Who would teach him such evil ways,
How come he never had a say,
Why was he beaten everyday,
To his Father, he was like a slave.

Broken body from taking abuse,
Soiled mind from being used,
I blew a damn fuse,
Over what that prick put him thru.

To me, he's been sweet as nectar,
I luv it when we together,
Like two birds of a feather,
Prince Lotor is one dude a chick like me treasures.

Far Far Away,
This place is too grey,
I'm the one that many degrade,
Besides findin luv, friendships are made.

One always had Zarkon's back,
Carryin out & leadin attacks,
Faithfulness never lacked,
When it came to Commander Yurak.

Ruthless & mean,
Takin missions to extremes,
He even became a robeast,
But he now R.I.P.

Another one took command,
He was a rather quiet man,
Carryin on the wicked plans,
To invade many lands.

He made the planet's growth sore,
His performances was no bore,
Then came the sword of Lotor,
And that was the end of Mogor.

To me & the Prince, this friendship's no loser,
This guy removed our tumors,
He was prone to gossip & rumors,

And had a great sense of humor.

In this dark place, there's still laughs,

Another who isn't wacked,

I find many jokes to crack,

When I kick it with Cossack.

Enemies found him unbearable,

With his phrases & parables,

His skills were incredible,

To the universe, he's known as Cossack The Terrible.

At the castle, many denizens came rushin,

Minds were puzzlin,

Security kept doublin,

For this chick who looked stunnin.

At first, she was ruthless,

No where close to clueless,

Telepathic abilities are never useless,

Damn, she was the absolute coolest.

Smoothly down the path,

Carryin herself with class,
So much riches in her stash,
Startin out by hittin Zarkon's ass.

On herself, she was high,
Face gleamin with pride,
Thinkin, "Oh, I'm fine,"
Flirtatious remarks became her lines.

At one time, she & the Prince were married,
Few hours later, that was buried,
With each other, they couldn't fairy,
This romance wasn't meant to be carried.

Even though me & her ex now rock,
Me & her do kick it a lot,
Chillin together at kick it spots,
This friendship can never be bought.

We became so close,
With personas that flow,
Together we've grown,
More precious than stones.

Females only allowed at her place,
She needs that to meditate,
I've been one she can trust with her bank,
So she gave me a position of very high rank.

A royal chick who shines like pearls,
Keepin every piece of her sterile,
When it cums to my world,
Queen Merla's my true homegirl.

She has this pet,
Who keeps away pesky insects,
Bad thoughts he can detect,
That damn vulture keeps hatas in check.

Far Far Away,
It's so insane,
Wickedness won't wait,
So much horror cums to play.

Unlimited tension,
So much disconception,

Man, this place is so depressin,
But one person takes it to another dimension.

Zarkon is such a smuck,
Who destructs,
That one dude may be his son,
But still, it's he I so much luv.

It stays dark at noon,
Even amidst all this gloom,
Sweet luv somewhere blooms,
On this dreary place called Planet Doom.

Far Far Away,
Eyes were in dismay,
Is ths a game,
Am I on Arus or a different place.

Small villages & towns,
Lakes, grass, trees, cover the ground,
All them peeps wearin crowns,
On this planet holdin it down.

Once it's people,
Like Doom was evil,
King had enough diesel,
To pull shit that wasn't legal.

They weren't too fond,
Of that mighty robot,
This Prince named Avok,
Wanted badly to punch out it's clock.

Did the dumbest thing,
By becoming a robeast,
Thinkin he could defeat,
That robot in one sweep.

All that then changed,
When Avok went unexplained,
& The king went insane,
Pollux's former evil begun to fade.

This planet now takes sides,
With the nearby twin that lies,
For they now despise,

The former whom they had ties.

They turned over a new leaf,
So they could fight for peace,
They were taken under the wing,
Of their former enemies.

Don't ever toy,
With this younger boy,
He's already annoyed,
Over what's been destroyed.

His temper can get short,
He fights enemies with force,
Rulership has been restored,
By this kid, Prince Bandor.

Then came a chick,
Who looked like a twin,
Of course, to Princess Allura, she's kin,
Only thing was she looked less innocent.

She was pretty feisty,

To those not of her liking,
Her fist would be striking,
On those who were more coniving.

It's not hard to tell,
That like her cousin, kindness dwells,
One of them flyboys fell,
For that chick named Princess Romelle.

Far Far Away,
Is where my head lays,
It's a special place,
That could never be replaced.

It's my second home,
That helped me grow,
The values I hold,
From where I don't grow old.

It's been a priviledge to inquire,
Those I admire,
They made me wiser,
The influence takes me higher.

I feel so much grief,
When I have to leave,
I begin to weep,
When it's this place I no longer see.

Across the universe,
Where reality is what works,
My place of birth,
Which is somewhere on Planet Earth.

Certain friends have much appeal,
Ones that never get sealed,
If u could only know how I feel,
I so much wish these people were real.

My place to be apart,
Is among the Denubian stars,
Where I've built an arc,
That holds a special place in my heart.

These people are angels God has sent,
Our relationships will have no end,

Even though they're non-existent,
I don't care, cuz them people are my friends.

My friends & I who bond together,
One I'll always treasure,
Existing for more than pleasure,
Those are my best friends forever.

Far Far Away,
Is miles away,
My special place,
Where I'll always stay.

It's my world beyond,
It's where I belong,
Forever, my heart lives on,
In this world of Voltron.
